MINNESOTA BULLETIN NO. 300-6-38

July 25, 2006

SUBJECT: LTP – CRP EMERGENCY HAYING AND GRAZING PROVISIONS

Purpose: To provide guidance for 2006 Conservation Reserve Program (CRP) emergency haying and grazing provisions.

Expiration date: October 1, 2006

Last Friday, July 21, 2006, the Farm Services Agency (FSA) approved provisions to immediately implement **emergency grazing** on CRP acres in Marshall, Pennington, Clearwater, East Polk, West Polk, and Red Lake Counties on practices CP-1, CP-2, CP4B, CP-4D, CP-10, CP-18C and CP-23. These counties have met the national CRP criteria for designation as being adversely effected by drought conditions. No other counties are approved for these provisions at this time, however as dry conditions persist we expect additional counties to meet the criteria and additional approvals to be made.

**Effective July 24<sup>th</sup> emergency haying** was also authorized in these same counties on the same practices (except practice CP-23). **The CP-23 practice acres will not be open to emergency haying until August 2<sup>nd</sup>.** All approved CRP acres must be hayed or grazed according to the provisions in a management plan. The emergency provisions have been agreed to on a state-wide basis and field staffs from FSA and NRCS are not authorized to modify any of the provisions.

Attached to this bulletin is a generic CRP Emergency Haying and Grazing Plan that must be agreed to and signed by all participating landowners. NRCS District Conservationists in affected counties, both those counties currently approved and those that become subsequently approved, will provide copies of this generic plan to their FSA CED. FSA employees will be responsible to work with participating CRP contract holders to;

- Complete the top portion of the plan, including listing the producer's name and CRP contract and location information.
- Review the plan provisions with producers, any producer with a technical question related to these provisions will be referred to NRCS.
- Obtain the producer's signature on the plan and provide the original to NRCS, and a copy to the producer.
- Inform producers that a 10% CRP payment reduction will apply to those acres where these provisions are implemented.

NRCS only has responsibility to provide technical assistance with these emergency provisions, for CRP contracts enrolled from sign-ups 29 – 33. However, due to the emergency drought conditions

and the adverse impact on our state's livestock farmers, NRCS has also agreed to provide emergency haying and grazing technical assistance for **all** eligible CRP contracts.

Questions on the information in this bulletin should be directed to Paul Flynn, State Resource Conservationist at 651-602-7870.
